Publishing Department: Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom

Volume 147 2000 UK ISSN 1350–2379

HONORARY EDITORS

Prof. H. Unbehauen (*Ruhr-Universität Bochum*)
Prof. D. P. Atherton (*University of Sussex*)
Prof. P. E. Wellstead (*UMIST*)

Pages in issues of *IEE Proc., Control Theory Appl.* 2000

Pages	Issue No.	Date
1–128	1	January
129–228	2	March
229–372	3	May
373–484	4	July
485–560	5	September
561–700	6	November

ADAPTIVE CONTROL

Adaptive control of a solar power plant using a multi-model p493
Adaptive inverse control algorithm for shock testing p267
Adaptive iterative learning control of uncertain robotic systems p217
Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Anti-windup schemes for uncertain nonlinear systems p321
Implementation of the Takagi-Sugeno model-based fuzzy control using an adaptive gain controller p509
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Neural network-based H^∞ tracking control for robotic systems p303
Recursive least determinant self-tuning regulator p285
Simple adaptive control for a power-system stabiliser p373
Survey of adaptive dual control methods p118

AEROSPACE SYSTEMS

Assignment of reduced sensitivity eigenstructure p104
Cancelling vibrations in flexible articulated structures using non-causal inverse dynamics p596
Control strategies for hardware-in-the-loop simulation of flexible space robots p569
Methodology for control of a space robot with flexible links p562

ARTIFICIAL INTELLIGENCE

Analysis of minimal radial basis function network algorithm for real-time identification of nonlinear dynamic systems p476
Crisp-type fuzzy logic controller using Dubois and Prade's parametric t-norm-sum-gravity inference methods p167
Design of dynamic neural observers p257
Neurofuzzy network model construction using Bezier-Bernstein polynomial functions p337
Unobservable fault-propagation control of serial production systems based on discrete-event models p381

CLOSED LOOP SYSTEMS

Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
Assignment of reduced sensitivity eigenstructure p104
Control of state-constrained linear dynamical systems: anti-reset windup approach p159
Counterexamples for sufficient and necessary conditions of internal stability p371
Criterion for global exponential stabilisability of a class of nonlinear control systems via an integral manifold approach p330
Disturbance attenuation in linear systems via dynamical compensators: a parametric eigenstructure assignment approach p129
Integrated approach to eigenstructure assignment in descriptor systems by PD and P state feedback p407
Neural controllers for nonlinear state feedback L_2-gain control p239
Neural network-based H^∞ tracking control for robotic systems p303
Online tuning of controllers for an unstable FOPDT process p421
Output-reference tracking problem for discrete-time systems with input saturations p447
Receding horizon H_∞ predictive control for systems with input saturation p153
Reliable LQG control with sensor failures p433
Resilient guaranteed cost control to tolerate actuator faults for discrete-time uncertain linear systems p277
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Shift and delta operator realisations for digital controllers with finite word length considerations p664

COMPUTERISED INSTRUMENTATION

Bandwidth allocation scheme in CAN protocol p37

CONTROL APPLICATIONS

Adaptive inverse control algorithm for shock testing p267
Anti-windup schemes for uncertain nonlinear systems p321
Bandwidth allocation scheme in CAN protocol p37
Fault detection in hot steel rolling using neural networks and multivariate statistics p633
Global predictive control: a unified control structure for decoupling setpoint tracking, feedforward compensation and disturbance rejection dynamics p465
Inferential control for rolling mills p673
Multivariable generalised predictive controller based on the Smith predictor p538
Process identifier and its application to industrial control p196
Regulation of the mold level using a vacuum in a steel continuous casting process p416

CONTROL EQUIPMENT

Adaptive inverse control algorithm for shock testing p267
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Global stabilisation of input-saturated systems subject to L_2 disturbances p53
Resilient guaranteed cost control to tolerate actuator faults for discrete-time uncertain linear systems p277

CONTROL SYSTEM ANALYSIS

Adaptive iterative learning control of uncertain robotic systems p217
Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Anti-windup schemes for uncertain nonlinear systems p321
Assignment of reduced sensitivity eigenstructure p104
Control of state-constrained linear dynamical systems: anti-reset windup approach p159
Counterexamples for sufficient and necessary conditions of internal stability p371
Criterion for global exponential stabilisability of a class of nonlinear control systems via an integral manifold approach p330
Decentralised control of multimachine power systems with guaranteed performance p355
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Discretisation of two degree-of-freedom controller and system with state, input and output delays p87
Disturbance attenuation in linear systems via dynamical compensators: a parametric eigenstructure assignment approach p129
Frequency response of uncertain systems: a 2q-convex parpolygonal approach p547
Geometric analysis of missile guidance command p205
Global stabilisation of input-saturated systems subject to L_2 disturbances p53
Improving the stability properties of the zeros of sampled systems with fractional order hold p456
Inferential control for rolling mills p673
Integrated approach to eigenstructure assignment in descriptor systems by PD and P state feedback p407
Integrated approach to observer eigenstructure assignment p556
Multirate-sampled digital feedback system design via a predictive control approach p293
Multivariable generalised predictive controller based on the Smith predictor p538
Neural controllers for nonlinear state feedback L_2-gain control p239
Neural network-based H^∞ tracking control for robotic systems p303
Numerical method for the analysis of time-varying singular systems p403
Output-reference tracking problem for discrete-time systems with input saturations p447
Parametric linear quadratic control and random delays p641
Passivity/sliding mode control of a stand-alone hybrid generation system p680
Polynomial LQG synthesis of subrate digital feedback systems p247
Process identifier and its application to industrial control p196
Reliable control of discrete-time systems with actuator failure p428
Reliable LQG control with sensor failures p433
Restricted-structure LQG optimal control for continuous-time systems p185
Robust compensator design for exploiting existing control systems p71
Robust control for nonlinear similar composite systems with uncertain parameters p80
Robust frequency shaping sliding mode control p312
Robust fuzzy control for robot manipulators p212
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Shift and delta operator realisations for digital controllers with finite word length considerations p664
SMVSC for a class of time-delay uncertain systems with mismatching uncertainties p687
Stabilisation of discrete-time interconnected systems under control constraints p137
Stability analysis of iterative optimal control algorithms modelled as linear unit memory repetitive processes p229
Survey of adaptive dual control methods p118
Unbiased identification of stochastic linear systems subject to coloured noise p485

CONTROL SYSTEM STABILITY

Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Control of state-constrained linear dynamical systems: anti-reset windup approach p159
Control strategies for hardware-in-the-loop simulation of flexible space robots p569
Counterexamples for sufficient and necessary conditions of internal stability p371
Criterion for global exponential stabilisability of a class of nonlinear control systems via an integral manifold approach p330
Decentralised control of multimachine power systems with guaranteed performance p355
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Disturbance attenuation in linear systems via dynamical compensators: a parametric eigenstructure assignment approach p129
Frequency response of uncertain systems: a 2q-convex parpolygonal approach p547
Global stabilisation of input-saturated systems subject to L_2 disturbances p53
Implementation of the Takagi-Sugeno model-based fuzzy control using an adaptive gain controller p509
Improving the stability properties of the zeros of sampled systems with fractional order hold p456
Inferential control for rolling mills p673
Methodology for control of a space robot with flexible links p562
Model predictive control of nonlinear systems: computational burden and stability p387
Multivariable generalised predictive controller based on the Smith predictor p538
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Neural network-based H^∞ tracking control for robotic systems p303
Optimal position control of synchronous reluctance motor via totally invariant variable structure control p28
Output-reference tracking problem for discrete-time systems with input saturations p447
Parametric linear quadratic control and random delays p641
Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694
Receding horizon H_∞ predictive control for systems with input saturation p153
Regulation of the mold level using a vacuum in a steel continuous casting process p416
Reliable control of discrete-time systems with actuator failure p428
Reliable LQG control with sensor failures p433
Restricted-structure LQG optimal control for continuous-time systems p185
Robust compensator design for exploiting existing control systems p71
Robust control for nonlinear similar composite systems with uncertain parameters p80
Robust frequency shaping sliding mode control p312
Robust fuzzy control for robot manipulators p212
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Robust predictive control using tight sets of predicted states p13

Root distribution of delta-operator formulated polynomials p1
Shift and delta operator realisations for digital controllers with finite word length considerations p664
Simple adaptive control for a power-system stabiliser p373
SMVSC for a class of time-delay uncertain systems with mismatching uncertainties p687
Stabilisation of discrete-time interconnected systems under control constraints p137
Table online neural control of systems with closed kinematic chains p619
Tip-trajectory tracking control of single-link flexible robots by output re-definition p580

CONTROL SYSTEM SYNTHESIS

Adaptive iterative learning control of uncertain robotic systems p217
Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Anti-windup schemes for uncertain nonlinear systems p321
Assignment of reduced sensitivity eigenstructure p104
Control of state-constrained linear dynamical systems: anti-reset windup approach p159
Decentralised control of multimachine power systems with guaranteed performance p355
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Disturbance attenuation in linear systems via dynamical compensators: a parametric eigenstructure assignment approach p129
Frequency response of uncertain systems: a 2q-convex parpolygonal approach p547
Geometric analysis of missile guidance command p205
Global stabilisation of input-saturated systems subject to L_2 disturbances p53
Inferential control for rolling mills p673
Multirate-sampled digital feedback system design via a predictive control approach p293
Neural controllers for nonlinear state feedback L_2-gain control p239
Neural network-based H^∞ tracking control for robotic systems p303
Parametric linear quadratic control and random delays p641
Passivity/sliding mode control of a stand-alone hybrid generation system p680
Polynomial LQG synthesis of subrate digital feedback systems p247
Reliable control of discrete-time systems with actuator failure p428
Robust compensator design for exploiting existing control systems p71
Robust control for nonlinear similar composite systems with uncertain parameters p80
Robust frequency shaping sliding mode control p312
Robust fuzzy control for robot manipulators p212
SMVSC for a class of time-delay uncertain systems with mismatching uncertainties p687

DATA COMMUNICATION

Bandwidth allocation scheme in CAN protocol p37

DC MACHINES

Global stabilisation of input-saturated systems subject to L_2 disturbances p53

DIGITAL TECHNIQUES

Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440

DISCRETE SYSTEMS

Analysis of minimal radial basis function network algorithm for real-time identification of nonlinear dynamic systems p476
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Improving the stability properties of the zeros of sampled systems with fractional order hold p456
Multirate-sampled digital feedback system design via a predictive control approach p293
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Output-reference tracking problem for discrete-time systems with input saturations p447
Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694
Polynomial LQG synthesis of subrate digital feedback systems p247
Reliable control of discrete-time systems with actuator failure p428
Resilient guaranteed cost control to tolerate actuator faults for discrete-time uncertain linear systems p277
Robust Kalman filtering for discrete state-delay systems p613
Robust state estimator of stochastic linear systems with unknown disturbances p224
Root distribution of delta-operator formulated polynomials p1
Shift and delta operator realisations for digital controllers with finite word length considerations p664
Stabilisation of discrete-time interconnected systems under control constraints p137
Stability analysis of iterative optimal control algorithms modelled as linear unit memory repetitive processes p229
Survey of adaptive dual control methods p118

DISTRIBUTED PARAMETER SYSTEMS

Cancelling vibrations in flexible articulated structures using non-causal inverse dynamics p596
Discretisation of two degree-of-freedom controller and system with state, input and output delays p87
Online tuning of controllers for an unstable FOPDT process p421
Parameter identification of continuous systems with multiple-input time delays via modulating functions p19
Parametric linear quadratic control and random delays p641
Robust Kalman filtering for discrete state-delay systems p613
SMVSC for a class of time-delay uncertain systems with mismatching uncertainties p687

ELECTRIC MACHINES

Global stabilisation of input-saturated systems subject to L_2 disturbances p53

ENERGY CONVERSION

Passivity/sliding mode control of a stand-alone hybrid generation system p680

ENGINEERING COMPUTING

Bandwidth allocation scheme in CAN protocol p37
Fault detection in hot steel rolling using neural networks and multivariate statistics p633
Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694

FEEDBACK

Analysis and design of robust adaptive control for nonlinear output feeuback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Counterexamples for sufficient and necessary conditions of internal stability p371
Criterion for global exponential stabilisability of a class of nonlinear control systems via an integral manifold approach p330
Discretisation of two degree-of-freedom controller and system with state, input and output delays p87
Inferential control for rolling mills p673
Methodology for control of a space robot with flexible links p562
Multirate-sampled digital feedback system design via a predictive control approach p293
Online tuning of controllers for an unstable FOPDT process p421
Polynomial LQG synthesis of subrate digital feedback systems p247
Regulation of the mold level using a vacuum in a steel continuous casting process p416
Restricted-structure LQG optimal control for continuous-time systems p185
Robust compensator design for exploiting existing control systems p71
Robust control for nonlinear similar composite systems with uncertain parameters p80
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Robust predictive control using tight sets of predicted states p13

FILTERS AND FILTERING

Adaptive filter for a linear time-varying system with a high-order estimator p395
Gain fusion algorithm for decentralised parallel Kalman filters p97
Stochastic stability of the continuous-time extended Kalman filter p45

FORMAL LOGIC

Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Neurofuzzy network model construction using Bezier-Bernstein polynomial functions p337

FUZZY CONTROL

Crisp-type fuzzy logic controller using Dubois and Prade's parametric t-norm-sum-gravity inference methods p167
Implementation of the Takagi-Sugeno model-based fuzzy control using an adaptive gain controller p509
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Robust fuzzy control for robot manipulators p212

MATHEMATICAL TECHNIQUES

Adaptive iterative learning control of uncertain robotic systems p217
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Decentralised control of multimachine power systems with guaranteed performance p355
Frequency response of uncertain systems: a 2q-convex parpolygonal approach p547
Geometric analysis of missile guidance command p205
Integrated approach to eigenstructure assignment in descriptor systems by PD and P state feedback p407
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Neural network-based H^∞ tracking control for robotic systems p303
Neurofuzzy network model construction using Bezier-Bernstein polynomial functions p337
Numerical method for the analysis of time-varying singular systems p403
Polynomial LQG synthesis of subrate digital feedback systems p247
Recursive least determinant self-tuning regulator p285
Reliable control of discrete-time systems with actuator failure p428
Reliable LQG control with sensor failures p433
Resilient guaranteed cost control to tolerate actuator faults for discrete-time uncertain linear systems p277
Restricted-structure LQG optimal control for continuous-time systems p185
Robust fuzzy control for robot manipulators p212
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Robust Kalman filtering for discrete state-delay systems p613
Robust predictive control using tight sets of predicted states p13
Root distribution of delta-operator formulated polynomials p1
Shift and delta operator realisations for digital controllers with finite word length considerations p664
Simple adaptive control for a power-system stabiliser p373
SMVSC for a class of time-delay uncertain systems with mismatching uncertainties p687
Stochastic stability of the continuous-time extended Kalman filter p45

MILITARY SYSTEMS

Geometric analysis of missile guidance command p205

MULTIVARIABLE CONTROL SYSTEMS

Actuator fault estimation with disturbance decoupling p501
Decentralised control of multimachine power systems with guaranteed performance p355
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Disturbance attenuation in linear systems via dynamical compensators: a parametric eigenstructure assignment approach p129
Global predictive control: a unified control structure for decoupling setpoint tracking, feedforward compensation and disturbance rejection dynamics p465
Multivariable generalised predictive controller based on the Smith predictor p538
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Neural network-based H^∞ tracking control for robotic systems p303
Optimal position control of synchronous reluctance motor via totally invariant variable structure control p28
Passivity/sliding mode control of a stand-alone hybrid generation system p680
Robust control for nonlinear similar composite systems with uncertain parameters p80
Robust frequency shaping sliding mode control p312
Robust state estimator of stochastic linear systems with unknown disturbances p224
SMVSC for a class of time-delay uncertain systems with mismatching uncertainties p687
Stabilisation of discrete-time interconnected systems under control constraints p137

NEURAL NETWORKS

Analysis of minimal radial basis function network algorithm for real-time identification of nonlinear dynamic systems p476
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Design of dynamic neural observers p257
Fault detection in hot steel rolling using neural networks and multivariate statistics p633
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Neural controllers for nonlinear state feedback L_2-gain control p239
Neural network-based H^∞ tracking control for robotic systems p303
Neurofuzzy network model construction using Bezier-Bernstein polynomial functions p337
Observer-based neuro identifier p145
Table online neural control of systems with closed kinematic chains p619

NONELECTRIC VARIABLES CONTROL

Adaptive control of a solar power plant using a multi-model p493
Adaptive inverse control algorithm for shock testing p267
Anti-windup schemes for uncertain nonlinear systems p321
Cancelling vibrations in flexible articulated structures using non-causal inverse dynamics p596
Control strategies for hardware-in-the-loop simulation of flexible space robots p569
Force control of a single-link flexible robot based on a collision detection mechanism p588
Inferential control for rolling mills p673
LQG and GA solutions for active steering of railway vehicles p111
Methodology for control of a space robot with flexible links p562
Neural network-based H^∞ tracking control for robotic systems p303
On the internal dynamics of flexible manipulators based on symmetric dichotomy p59
Optimal position control of synchronous reluctance motor via totally invariant variable structure control p28
Parallel force and position control of flexible manipulators p605
Regulation of the mold level using a vacuum in a steel continuous casting process p416
Robot angular link velocity estimation in the presence of high-level mixed uncertainties p515
Robust fuzzy control for robot manipulators p212
Table online neural control of systems with closed kinematic chains p619
Tip-trajectory tracking control of single-link flexible robots by output re-definition p580

NONLINEAR CONTROL SYSTEMS

Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
Analysis of minimal radial basis function network algorithm for real-time identification of nonlinear dynamic systems p476
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Anti-windup schemes for uncertain nonlinear systems p321
Crisp-type fuzzy logic controller using Dubois and Prade's parametric t-norm-sum-gravity inference methods p167
Criterion for global exponential stabilisability of a class of nonlinear control systems via an integral manifold approach p330
Implementation of the Takagi-Sugeno model-based fuzzy control using an adaptive gain controller p509
Model predictive control of nonlinear systems: computational burden and stability p387
Neural controllers for nonlinear state feedback L_2-gain control p239
Neural network-based H^∞ tracking control for robotic systems p303
Online tuning of controllers for an unstable FOPDT process p421
Output-reference tracking problem for discrete-time systems with input saturations p447
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Process identifier and its application to industrial control p196
Regulation of the mold level using a vacuum in a steel continuous casting process p416
Robot angular link velocity estimation in the presence of high-level mixed uncertainties p515
Robust control for nonlinear similar composite systems with uncertain parameters p80
Robust fuzzy control for robot manipulators p212
Stabilisation of discrete-time interconnected systems under control constraints p137

NUMERICAL ANALYSIS

Adaptive inverse control algorithm for shock testing p267
Discretisation of two degree-of-freedom controller and system with state, input and output delays p87
Numerical method for the analysis of time-varying singular systems p403
On the internal dynamics of flexible manipulators based on symmetric dichotomy p59
Recursive least determinant self-tuning regulator p285
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Stability analysis of iterative optimal control algorithms modelled as linear unit memory repetitive processes p229

OPTIMAL CONTROL

Adaptive control of a solar power plant using a multi-model p493
Control of state-constrained linear dynamical systems: anti-reset windup approach p159
Criterion for global exponential stabilisability of a class of nonlinear control systems via an integral manifold approach p330
Discrete-time sliding mode proximate time optimal seek control of hard disk drives p440
Discretisation of two degree-of-freedom controller and system with state, input and output delays p87
Disturbance attenuation in linear systems via dynamical compensators: a parametric eigenstructure assignment approach p129
Global predictive control: a unified control structure for decoupling setpoint tracking, feedforward compensation and disturbance rejection dynamics p465
Implementation of the Takagi-Sugeno model-based fuzzy control using an adaptive gain controller p509
LQG and GA solutions for active steering of railway vehicles p111
Model predictive control of nonlinear systems: computational burden and stability p387
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Multirate-sampled digital feedback system design via a predictive control approach p293
Multivariable generalised predictive controller based on the Smith predictor p538
Neural network-based H^∞ tracking control for robotic systems p303
Optimal position control of synchronous reluctance motor via totally invariant variable structure control p28
Parametric linear quadratic control and random delays p641
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Polynomial LQG synthesis of subrate digital feedback systems p247
Receding horizon H_∞ predictive control for systems with input saturation p153
Reliable control of discrete-time systems with actuator failure p428
Reliable LQG control with sensor failures p433
Restricted-structure LQG optimal control for continuous-time systems p185
Robust frequency shaping sliding mode control p312
Robust H_∞ control for uncertain linear time invariant descriptor systems p648
Robust predictive control using tight sets of predicted states p13
Stability analysis of iterative optimal control algorithms modelled as linear unit memory repetitive processes p229

OPTIMISATION

LQG and GA solutions for active steering of railway vehicles p111
Model predictive control of nonlinear systems: computational burden and stability p387
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Restricted-structure LQG optimal control for continuous-time systems p185
Robust predictive control using tight sets of predicted states p13
Shift and delta operator realisations for digital controllers with finite word length considerations p664

PARALLEL PROCESSING

Gain fusion algorithm for decentralised parallel Kalman filters p97

PARAMETER ESTIMATION

Adaptive filter for a linear time-varying system with a high-order estimator p395
Adaptive iterative learning control of uncertain robotic systems p217
Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Parameter identification of continuous systems with multiple-input time delays via modulating functions p19
Unbiased identification of stochastic linear systems subject to coloured noise p485

POWER CONVERTERS

Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694

POWER ENGINEERING COMPUTING

Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694

POWER SYSTEM CONTROL

Adaptive control of a solar power plant using a multi-model p493
Decentralised control of multimachine power systems with guaranteed performance p355
Global stabilisation of input-saturated systems subject to L_2 disturbances p53
Optimal position control of synchronous reluctance motor via totally invariant variable structure control p28
Passivity/sliding mode control of a stand-alone hybrid generation system p680
Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Simple adaptive control for a power-system stabiliser p373

POWER SYSTEM MANAGEMENT

Decentralised control of multimachine power systems with guaranteed performance p355

POWER SYSTEMS AND PLANTS

Passivity/sliding mode control of a stand-alone hybrid generation system p680
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Simple adaptive control for a power-system stabiliser p373

PREDICTIVE CONTROL

Discretisation of two degree-of-freedom controller and system with state, input and output delays p87
Global predictive control: a unified control structure for decoupling setpoint tracking, feedforward compensation and disturbance rejection dynamics p465
Model predictive control of nonlinear systems: computational burden and stability p387
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Multirate-sampled digital feedback system design via a predictive control approach p293
Multivariable generalised predictive controller based on the Smith predictor p538
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Receding horizon H_∞ predictive control for systems with input saturation p153
Robust predictive control using tight sets of predicted states p13

PRODUCTION ENGINEERING

Fault detection in hot steel rolling using neural networks and multivariate statistics p633

RADAR AND RADIONAVIGATION

Geometric analysis of missile guidance command p205

ROBOTICS

Adaptive iterative learning control of uncertain robotic systems p217
Cancelling vibrations in flexible articulated structures using non-causal inverse dynamics p596
Control strategies for hardware-in-the-loop simulation of flexible space robots p569
Force control of a single-link flexible robot based on a collision detection mechanism p588
Methodology for control of a space robot with flexible links p562
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Neural network-based H^∞ tracking control for robotic systems p303
On the internal dynamics of flexible manipulators based on symmetric dichotomy p59
Parallel force and position control of flexible manipulators p605
Robot angular link velocity estimation in the presence of high-level mixed uncertainties p515
Robust fuzzy control for robot manipulators p212
Table online neural control of systems with closed kinematic chains p619
Tip-trajectory tracking control of single-link flexible robots by output re-definition p580

SELF-ADJUSTING SYSTEMS

Adaptive control of a solar power plant using a multi-model p493
Adaptive inverse control algorithm for shock testing p267
Adaptive iterative learning control of uncertain robotic systems p217
Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Anti-windup schemes for uncertain nonlinear systems p321
Implementation of the Takagi-Sugeno model-based fuzzy control using an adaptive gain controller p509
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Neural adaptive tracking controller for robot manipulators with unknown dynamics p366
Neural network-based H^∞ tracking control for robotic systems p303
Periodic errors elimination in CVCF PWM DC/AC converter systems: repetitive control approach p694
Receding horizon H_∞ predictive control for systems with input saturation p153
Recursive least determinant self-tuning regulator p285
Simple adaptive control for a power-system stabiliser p373
Survey of adaptive dual control methods p118

SENSORS AND ACTUATORS

Gain fusion algorithm for decentralised parallel Kalman filters p97

SIGNAL PROCESSING

Adaptive filter for a linear time-varying system with a high-order estimator p395
Adaptive inverse control algorithm for shock testing p267
Design of dynamic neural observers p257
Gain fusion algorithm for decentralised parallel Kalman filters p97
LQG and GA solutions for active steering of railway vehicles p111
Multirate-sampled digital feedback system design via a predictive control approach p293
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Robust Kalman filtering for discrete state-delay systems p613
Robust state estimator of stochastic linear systems with unknown disturbances p224
Root distribution of delta-operator formulated polynomials p1
Stochastic stability of the continuous-time extended Kalman filter p45

SIMULATION, MODELLING AND IDENTIFICATION

Actuator fault estimation with disturbance decoupling p501
Adaptive control of a solar power plant using a multi-model p493
Adaptive filter for a linear time-varying system with a high-order estimator p395
Adaptive iterative learning control of uncertain robotic systems p217
Analysis and design of robust adaptive control for nonlinear output feedback systems under disturbances with unknown bounds p655
Analysis of minimal radial basis function network algorithm for real-time identification of nonlinear dynamic systems p476
ANNNAC–extension of adaptive backstepping algorithm with artificial neural networks p177
Control strategies for hardware-in-the-loop simulation of flexible space robots p569
Design of dynamic neural observers p257
Integrated approach to observer eigenstructure assignment p556
LQG and GA solutions for active steering of railway vehicles p111
Multi-objective genetic optimisation of GPC and SOFLC tuning parameters using a fuzzy-based ranking method p344
Observer-based neuro identifier p145
Online tuning of controllers for an unstable FOPDT process p421
Parameter identification of continuous systems with multiple-input time delays via modulating functions p19
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Process identifier and its application to industrial control p196
Recursive least determinant self-tuning regulator p285
Restricted-structure LQG optimal control for continuous-time systems p185
Robot angular link velocity estimation in the presence of high-level mixed uncertainties p515
Robust Kalman filtering for discrete state-delay systems p613
Robust state estimator of stochastic linear systems with unknown disturbances p224
Stochastic stability of the continuous-time extended Kalman filter p45
Unbiased identification of stochastic linear systems subject to coloured noise p485
Unobservable fault-propagation control of serial production systems based on discrete-event models p381

STATISTICAL ANALYSIS

Adaptive control of a solar power plant using a multi-model p493
Parametric linear quadratic control and random delays p641

SYNCHRONOUS MACHINES

Optimal position control of synchronous reluctance motor via totally invariant variable structure control p28
Simple adaptive control for a power-system stabiliser p373

SYSTEMS THEORY

Robust state estimator of stochastic linear systems with unknown disturbances p224
Unobservable fault-propagation control of serial production systems based on discrete-event models p381

TIME-VARYING SYSTEMS

Adaptive filter for a linear time-varying system with a high-order estimator p395
Analysis of minimal radial basis function network algorithm for real-time identification of nonlinear dynamic systems p476
Numerical method for the analysis of time-varying singular systems p403
Output-reference tracking problem for discrete-time systems with input saturations p447
Parametric linear quadratic control and random delays p641
Plant-wide predictive control for a thermal power plant based on a physical plant model p523
Robust predictive control using tight sets of predicted states p13
Robust state estimator of stochastic linear systems with unknown disturbances p224
Unbiased identification of stochastic linear systems subject to coloured noise p485

TRANSPORTATION

LQG and GA solutions for active steering of railway vehicles p111
